PRE-OFFER DEAL SCREEN

investadvisors.org: a small ad site with no clear revenue

Subject: Insurance and finance article site, live on Flippa (listing 10896092), asking $4,000 · Screen date: 3 Nov 2026 · Basis: the public listing only. Price shown is the seller's asking price (multiples set to match it).

Call: pass unless the price falls. Suggested bid **$1,600 to $2,000** (up to 2.0x annual profit, never above 95% of the price). Walk away above about **$4,000** (asking price). My rule: proceed if payback with revenue down 20% is 3.5 years or less.

1. The numbers at a glance

ITEM	VALUE	STATUS
Monthly profit	$82	COPIED listing
Profit margin	91%	COPIED
Monthly page views or orders	5,233	COPIED
Profit / revenue multiple	4.1x / 3.7x	COPIED
Monthly revenue, monthly costs	$90 / $8	DERIVED profit / margin
Annual profit	$984	DERIVED
Revenue per 1,000 views	$17	DERIVED
Asking price	about $4,000	COPIED asking price on the listing

2. What drives the call

- The numbers do not agree: the card shows revenue $90 and profit $82 a month, the page shows revenue $0, and the description claims about $180 a month from AdSense.
- Asking price is about 4 years of stated profit for a site earning under $100 a month.
- Only AdSense is verified. The seller describes it as a starter site from January 2021 with hand-written articles.
- Page views are 5,233 a month, which is thin for insurance content; search traffic could be wiped out by one update.

2b. Payback under falling revenue (costs held at $8 a month)

SCENARIO	PROFIT / MONTH	PAYBACK (YEARS)
Flat	$82	4.1
Revenue -20%	$64	5.2
Revenue -40%	$46	7.3
Revenue -60%	$28	11.9

Simulation (20,000 runs, assumed ranges: revenue change -60% to +30%, a 15% chance the main income source leaves, $0 to $13 a month of added cost): price recovered within 36 months in about 0% of runs and within 24 months in about 0%. Ranges are assumptions, not data.

Red flags

RISK	CHANCE (MY JUDGMENT)	WHY
Real income is far below the claimed $180	about 60%	Three different numbers on one listing
Search traffic falls	about 40%	Small site, insurance topic, hard to rank
AdSense account cannot move to buyer	about 30%	AdSense accounts are tied to the publisher

3. Questions for the seller

1. AdSense payment history for 24 months (screenshots of payments, not estimates).
2. Which is right: $0, $90 or $180 monthly revenue?
3. Traffic by source and country for 24 months.
4. Search Console export: queries and positions.
5. How are AdSense payouts transferred to a new owner?
6. Who wrote the articles, were they AI generated, and who owns the rights?
7. Any AdSense warnings or limited-ads notices.
8. Hosting and domain costs and renewal dates.
9. Any backlinks bought or exchanged.
10. Why is the price about 4 years of profit?

4. What this screen is not

This is a short screen for discussion. It is not a quality-of-earnings report, no CPA signs it, and it is not legal, tax or investment advice. It uses only the public listing, did not contact the seller, and could not verify any figure against bank statements. The price and all chances are estimates.
