PRE-OFFER DEAL SCREEN

mysupermarketcompare.com: tiny profit, big traffic, numbers that do not agree

Subject: UK insurance comparison site, live on Flippa (listing 12168548), asking $10,789 · Screen date: 3 Nov 2026 · Basis: the public listing only. Price shown is the seller's asking price (multiples set to match it).

Call: pass unless the price falls. Suggested bid **$5,900 to $7,400** (up to 2.0x annual profit, never above 95% of the price). Walk away above about **$10,789** (asking price). My rule: proceed if payback with revenue down 20% is 3.5 years or less.

1. The numbers at a glance

ITEM	VALUE	STATUS
Monthly profit	$309	COPIED listing
Profit margin	96%	COPIED
Monthly page views or orders	152,122	COPIED
Profit / revenue multiple	2.9x / 2.8x	COPIED
Monthly revenue, monthly costs	$323 / $14	DERIVED profit / margin
Annual profit	$3,708	DERIVED
Revenue per 1,000 views	$2	DERIVED
Asking price	about $10,789	COPIED asking price on the listing

2. What drives the call

- The listing page and the search card disagree: card shows revenue $323 and profit $309 a month; the page shows revenue $383 and profit $285. This screen uses the card; ask which is right.
- Revenue per 1,000 views is only about $2, so 152,122 views earn very little. Either the traffic count is wrong or most visitors never click through to the partner.
- All revenue is affiliate commission from one partner company (single payer). The seller says 1 hour a week of work and a 95% margin.
- Only Google Analytics is verified; the seller advertises 16 months of partner statements, which should be seen before any offer.

2b. Payback under falling revenue (costs held at $14 a month)

SCENARIO	PROFIT / MONTH	PAYBACK (YEARS)
Flat	$309	2.9
Revenue -20%	$244	3.7
Revenue -40%	$180	5.0
Revenue -60%	$115	7.8

Simulation (20,000 runs, assumed ranges: revenue change -60% to +30%, a 15% chance the main income source leaves, $0 to $45 a month of added cost): price recovered within 36 months in about 17% of runs and within 24 months in about 0%. Ranges are assumptions, not data.

Red flags

RISK	CHANCE (MY JUDGMENT)	WHY
The one partner cuts or ends the commission	about 25%	Single payer; no contract shown
Traffic figure is overstated or bot-inflated	about 30%	152k views but about $2 revenue per 1,000
Profit really is lower than listed	about 40%	Two different profit numbers on the same listing

3. Questions for the seller

1. Partner statements for all 16 months, matching bank deposits.
2. Which profit figure is right: $309 or $285, and why do they differ?
3. Traffic by country and by source for 12 months (Search Console export).
4. Why is revenue per 1,000 views so low: how many clicks go to the partner?
5. Is there a written agreement with the partner company, and does it transfer to a new owner?
6. Does the seller write or update the content, and who would after sale?
7. Any Google penalty, manual action or traffic drop in the last 12 months.
8. Do you hold FCA or affiliate-network permissions the site relies on? (UK comparison sites can need them.)
9. What costs sit between revenue and profit, who is paid?
10. Will the seller stay 60 days for hand-over?

4. What this screen is not

This is a short screen for discussion. It is not a quality-of-earnings report, no CPA signs it, and it is not legal, tax or investment advice. It uses only the public listing, did not contact the seller, and could not verify any figure against bank statements. The price and all chances are estimates.
