PRE-OFFER DEAL SCREEN · SAMPLE

East Insurance Group: a fair price for a fragile traffic base

Subject: US insurance-guides website, sold on Flippa (listing 11356430) · Screen date: 1 Nov 2026 · Basis: the public listing page only. The sold price is hidden, so the price below is my estimate. This is a sample of the format.

Call: proceed with conditions. Suggested bid **$29,500 to $36,900** (1.6x to 2.0x annual profit). Walk away above about **$42,800**. Conditions in section 3.

1. The numbers at a glance

ITEM	VALUE	STATUS
Monthly profit	$1,539	COPIED listing, Flippa-vetted
Profit margin	94%	COPIED
Page views per month	2,573	COPIED
Profit multiple / revenue multiple	2.3x / 2.2x	COPIED
Monthly revenue, monthly costs	$1,637 / $98	DERIVED profit / margin
Annual profit	$18,468	DERIVED
Revenue per 1,000 page views	$636	DERIVED
Estimated price	about $42,800	ASSUMED 2.3x profit, 2.2x revenue; the method reproduces two other listings' asking prices within 1%
Site age	11 years	CONFLICT listing text says "over seven years"

2. What drives the call

- **Price is in range.** 2.3x profit sits between the two live insurance listings found (2.9x and 0.3x). Flat profit repays the estimated price in about 2.3 years.
- **Income is probably concentrated.** About $636 per 1,000 views is far above display-ad income, so most revenue is likely lead sales to a few partners. Losing one could cut revenue sharply.
- **Traffic is the weak point.** The listing admits a Google update hurt the site, and 2,573 views a month leaves little buffer.

2b. Payback under falling revenue (costs held at $98 a month)

SCENARIO	PROFIT / MONTH	PAYBACK (YEARS)
Flat	$1,539	2.3
Revenue -20%	$1,212	2.9
Revenue -40%	$884	4.0
Revenue -60%	$557	6.4

Simulation (20,000 runs, my assumed ranges: revenue change -60% to +30%, a 15% chance the main partner leaves, $0 to $500 a month of added cost): the price is recovered within 36 months in about 38% of runs and within 24 months in under 1%. Ranges are assumptions, not data.

Red flags

RISK	CHANCE (MY JUDGMENT)	WHY
Search traffic falls again	about 36%	Single traffic source; a core update already hurt it
Main lead partner leaves	15 to 25%	Revenue per view implies few payers
AI search takes clicks	about 40%	Insurance guides are easy for AI answers to summarise
Writer leaves	about 30%	One freelancer carries the content
Figures overstated	about 10%	Flippa vetted revenue, expenses and traffic
Lead rules (US insurance leads)	about 15%	Licences and consent records may apply; not checked here

3. Conditions before bidding

- Revenue by partner shows no single payer above about 40% of revenue (my threshold).
- Search Console shows traffic stable for the last six months.
- Payout statements match the stated profit.
- The writer agrees to stay at least six months.

If two of the four fail, pass.

4. Ten questions for the seller

1. Revenue by partner for the last 24 months, and the contracts behind each.
2. Search Console clicks and impressions for 24 months, with the date of the Google update.
3. Top 20 pages by traffic and by revenue.
4. Payout statements and bank deposits that match the stated profit.
5. What the $98 of monthly costs contain; is the writer fully paid out of it?
6. Can partners move to the new owner, and on what terms?
7. Why does the site age differ between the listing field and the text?
8. Any manual penalties, paid links or link-building history.
9. What the writer is paid and whether they agree to stay.
10. Consent, licence and disclosure language on the lead forms.

5. What this screen is not

This is a short screen for discussion. It is not a quality-of-earnings report, no CPA signs it, and it is not legal, tax or investment advice. It uses only the public listing page, did not contact the seller or buyer, and could not verify any figure against bank statements. The price is an estimate.
